Education

Yale University

New Haven, CT

Bachelor of Science in Computer Science

May 2025

- **Relevant Coursework:** Data Structures, Algorithms, Artificial Intelligence, Advanced Software Engineering, Object-Oriented Programming, Full Stack Web Programming, Human-Computer Interaction

Technical Skills

Programming: Python, JavaScript, SQL, HTML/CSS, Java (basic)

Frameworks: Flask, Django, Laravel

AI & Developer Tools: Claude, GitHub Copilot, OpenAI API, Gemini API

Databases: MySQL, SQLAlchemy, Firebase

Tools: Git, Linux, REST APIs

Experience

English Language Assistant — TAPIF Program

Oct. 2025 – May 2026

Académie de Poitiers, France

- Delivered English-language instruction across **19 classes** (ages 3–11), adapting lessons for diverse learning needs and collaborating with school staff across multiple schools.

Tech Fellow (Teaching Assistant) — CodePath TIP 102

Sept. 2025 – Dec. 2025

Remote

- Selected for CodePath's competitive TIP 102 program focused on data structures, algorithms, and technical interview preparation.
- Mentored **10–15 students per session**, guiding algorithmic problem-solving, debugging, and time complexity analysis in **Python**.
- Improved student understanding of core concepts through structured walkthroughs and real-time coding support.

Software Developer — Coily Curly Office (COCO)

Sept. 2024 – Sept. 2025

Yale University

New Haven, CT

- Developed, tested, and maintained a full-stack web platform connecting student hairstylists with clients using **PHP (Laravel)** and **MySQL**.
- Implemented role-based authentication, database-driven user management, and secure data access controls to ensure secure data access.
- Built an **appointment scheduling system** using **FullCalendar library** and an **AJAX-based filtering system**, enabling users to manage bookings and dynamically search availability.

Full Stack Web Development Learning Assistant

Jan. 2025 – May 2025

Yale University

New Haven, CT

- Supported **100+ students** through debugging, code reviews, troubleshooting, and software development best practices.
- Led office hours and 1:1 sessions, troubleshooting technical issues and providing guidance in **Flask, Python, SQL, HTML, and CSS**.

SEO Tech Developer Intern

Jun 2023 – Aug. 2023

Remote

- Built, tested, and maintained **two full-stack web applications** using **Flask, SQLAlchemy, JavaScript, HTML/CSS, and SQL** while collaborating in Agile teams.
- Led frontend development for a malware detection platform integrating external APIs and network diagnostic tools.

Projects

FlashLearn (GitHub)

- Developed a flashcard learning platform using **Flask** and **Firebase** for backend, storage, and authentication.
- Integrated the **OpenAI API** to dynamically generate flashcards and study content.
- Implemented spaced repetition algorithms (**SM-2, Leitner system**) for adaptive review scheduling.
- Designed an interactive frontend using **JavaScript** and **CSS** for real-time user input and progress tracking.

YaliePlan (GitHub)

- Collaborated in a team of 5 to build a personalized scheduling app using a **Django REST API** backend and **React** frontend.
- Integrated **Gemini API** to generate personalized schedule recommendations.
- Developed a rule-based recommendation system for customized user schedules.
